CIGNA Infertility Centers of Excellence

The hospitals and doctors in this directory meet CIGNA HealthCare criteria for designation as a CIGNA Centers of Excellence for Infertility treatment. Our evaluation process was conducted by medical executives and clinical specialists. Facilities were assessed against a series of criteria developed in accordance with guidelines from the Center for Disease Control. Factors that were evaluated include Board Certified Reproductive Endocrinologists and use of accredited labs. Episodic Treatment Groups (ETGs) were used to evaluate cost where available.

Our list of Centers of Excellence for Infertility is an additional piece of information you may wish to consider as you decide where to seek services. Confirm that the Infertility treatment is a covered benefit under your plan and that your doctor participates in the provider network. Check your benefits to verify the level of benefits you receive when having infertility services at a center of excellence or from a doctor associated with a center of excellence.

Always consult with your doctor about what decision is right for you. The doctors listed in this directory provide services at a CIGNA Centers of Excellence for Infertility treatment. It is our policy to regularly review all our participating healthcare providers against our credentialing standards, and the lack of inclusion here does not indicate that a provider is not a quality provider of infertility services.
